

## Banff School Kids Program

For those who are unfamiliar with our company, Snowtips-Bactrax began in 1979 when a group of friends wanted to offer equipment rentals to both visitors travelling across the globe, and locals alike. We pride ourselves in prioritizing our community and the people that make up our home, and that's by offering programs like this.

The Banff Kids Program has provided families with the opportunity to rent equipment for the whole season for a set price, and the flexibility to change that equipment over the course of the season in the scenario their child grows substantially. It promotes children to get outside and experience skiing for possibly the first time, while supporting families with the financial burden of buying new equipment every season while their kids are growing.

The eligibility for this program is very flexible, we offer it to all kids who attend the Banff Elementary School under the ages of 12. The price is \$150 + GST for the whole season, this includes skis, boots, and poles for the child. Parents can keep the equipment for the whole season, and exchange sizing as many times as they like, then returning the equipment by May 1<sup>st</sup>. We do require credit card details for security, as we do for all our other rentals to ensure that the equipment comes back.

The deadline for this program is December 20<sup>th</sup>, we do not offer this program after this date until the following season. Reservations are not required; we just request you try to come after school one day during the week with your child verses the weekend when we're at our peak busy period.
